this book illustrates why a holistic approach is important in pediatric palliative care ppc readers will learn this approach has a horizontal axis featuring the patients mental and physical needs as well as their environments it has also a vertical axis the evolutive changes of the patients throughout their development and their illness their aspirations and fears an evolutive or dynamic approach is mandatory each child parent has a different experience of illness and a different path to recovery that is influenced by their age gender culture but also by the state of their grief to take care of them we need to know the state of the subjects we are dealing with throughout their evolution in age children and in sorrow both children and parents jung s and piaget schemes will be of support this book also helps caregivers to know what ethics is it teaches a new insight on the word ethics not a series of principles or norms but an approach based on humanistic virtues two criteria will be proposed to this aim an ethics based on the refusal of inauthentic behaviors or those behaviors that are copies of animals or machines and a new criterion that even children have some ethical duties not based on rules but on naturally acceptance that their sight is modulated by the presence of their parents and friends this ethical approach is explained to caregivers in a practical mode ready for clinical exigencies this book is also unique because it demonstrates that ppc also involves the true care of caregivers it will explain how to approach measure and overcome caregivers burn out special attention is devoted to the approach to babies and children s pharmacological and non pharmacological analgesia and sedation pain assessment methods will be illustrated as well as the development of a ppc web on the territory this text includes perinatal and neonatal ppc the book will be of valuable support to all those intensivists pediatricians nurses psychologists physiotherapists and healthcare professionals working in ppc units

the new york times bestseller that explores animal intelligence and will alter the way we as humans view other species have you ever wondered what it is like to be a fish or a parrot dolphin or an elephant do they experience thoughts that are similar to ours or have feelings of

grief and love these are tough questions but scientists are answering them they know that ants teach and rats love to be tickled they've discovered that dogs have thousand word vocabularies and that birds practice their songs in their sleep but how do scientists know these things animal wise takes us on a dazzling odyssey into the inner world of animals and among the pioneering researchers who are leading the way into once uncharted territory the animal mind morell uses her formidable gifts as a storyteller to transport us to field sites and laboratories around the world introducing us to animal cognition scientists and their surprisingly intelligent and sensitive subjects she explores how this rapidly evolving controversial field has only recently overturned old notions about why animals behave as they do in this surprising and moving book morell brings the world of nature brilliantly alive in a nuanced deeply felt appreciation of the human animal bond
