vilified as the great failure of all london transport bus classes the dms family of daimler fleetline was more like an unlucky victim of straitened times desperate to match staff shortages with falling demand for its services during the late 1960s london transport was just one organization to see nationwide possibilities and savings in legislation that was about to permit double deck one man operation and partially fund purpose built vehicles however prohibited by circumstances from developing its own rear engined routemaster firm concept It instituted comparative trials between contemporary leyland atlanteans and daimler fleetlines the latter came out on top and massive orders followed the first dmss entering service on 2 january 1971 in service however problems quickly manifested sophisticated safety features served only to burn out gearboxes and gulp fuel the passengers meanwhile did not appreciate being funnelled through the dms s recalcitrant automatic fare collection machinery only to have to stand for lack of seating boarding speeds thus slowed to a crawl to the extent that the savings made by laying off conductors had to be negated by adding more dmss to converted routes second

thoughts caused the ongoing order to be amended to include crew operated fleetlines dms noise concerns prompted the development of the b20 quiet bus variety and brave attempts were made to fit the buses into the time honored system of overhauling at aldenham works but finally the problems proved too much after enormous expenditure the first dmss began to be withdrawn before the final rts came out of service and between 1979 and 1983 all but the b20s were sold as is widely known the dmss proved perfectly adequate with provincial operators once their london features had been removed opo was to become fashionable again in the 1980s as the politicians turned on london transport itself breaking it into pieces in order to sell it off not only did the b20 dmss survive to something approaching a normal lifespan but the new cheap operators awakening with the onset of tendering made use of the type to undercut it and it was not until 1993 that the last dms operated

a superbly illustrated history of the leyland bus one of the most important british buses of the twentieth century with full production histories and technical specifications for all the major models also covers the evolution of the leyland bus company and tells the full story behind the iconic leyland badge including some previously unseen illustrations the book gives a full company history from beginnings as the lancashire steam motor company in 1886 to the acquisition by volvo buses in 1988 technical details of all the main models are given including the lion titan and olympic ranges gearless buses and rear engined double deckers are covered as well as charabancs trolleybuses first world war military vehicles and overseas models this will be an essential guide to these much treasured vehicles and is beautifully illustrated with some never before seen pictures from the leyland company s archives including 153 black white photographs and 106 colour and b w prints

the buses and coaches of bristol and eastern coach works outlines the history of bristol commercial vehicles and eastern coach works ecw two manufacturers that together developed some of the most familiar buses and coaches of the twentieth century the book covers the full production histories and specifications for the standard range of models produced from 1936 to 1983 the variety of engines used to power bristol ecw is outlined and a mechanical specification for each chassis is provided along with a description of the different body styles produced by ecw for each chassis there is also a chapter on owners experiences and advice on buying a bus for preservation

after 1945 many countries needed new vehicles in order to replace those that had been destroyed or worn out in the war and so british factories were offered incentives to

produce and export lorries foden were one such company to take advantage of the opportunities available and in the 1950s had agents in almost every west european country in the 1970s when the european market had declined the middle east australia and south africa markets rose to prominence and from the 1980s onwards new zealand became the primary destination for the marque by the time production finally ceased in 2006 they had sold vehicles all over the world the vehicles produced for export differed greatly from the designs used in britain in many countries the gross weights of vehicles exceeded the british values significantly so the majority of foden export vehicles had much stronger chassis gearboxes axles suspensions and more powerful engines than their british counterparts many also had tropical double roofs to keep the heat out and sleeper cabs long before they became common in the uk this comprehensive book detailing the lorries that foden exported around the world follows on from the publication of the author s first book about the fodens produced and used within the uk foden special vehicles it includes 364 fascinating photographs many of which have never been previously published and will be of interest to all foden fans and transport enthusiasts in general

a new comprehensive guide to motoring and transport museums offering a fresh conversation on their role and the portrayal of our motoring history written by a long established motoring writer with wide experience of driving and the fettling of old cars all over the world this new motor museum companion includes british motoring and transport museums guide via descriptions and photographs 90 british museums described comprehensive world motor museum listing over 350 global museums cited out takes from visits to selected overseas museums provides a glossary of old car motorcycle terms and types to assist the museum visitor and old car enthusiast discusses the museum culture and its new age visits to many museums by the author were self funded he paid his own way

the dennis company has been building vehicles since 1895 making it the oldest continuously producing british manufacturer from its origins in a small guildford shop the company has grown to become a major bus manufacturer with its products selling around the world this book discusses the company s highs and lows through two world wars challenging markets and ownership changes it documents the vehicles produced and their innovative design features from early cars and street cleaning machines to vans buses trucks fire engines and ambulances first hand descriptions of how and why some of the company s most successful products such as the dart trident and enviro buses evolved it explains why their once market leading fire engines are no longer

made it also analyses the reasons why some products were less successful and explores what happened to parts of the company that were sold over the years finally the company's future opportunities and challenges are considered the author andy goundry has not only drawn on his own personal experience of almost twenty years of employment with the company but he has drawn on what is left of the company archives private collections and first hand accounts to produce this book as a salutation of over 125 years of continuous manufacturing

describes different kinds of trucks from more than 30 leading manufacturers
